Special Offers

Ceramic Passive Self-Ligating Bracket System

Truly Aesthetic, Passive Self-Ligating Bracket System

Fully Aesthetic Polycrystalline Ceramic Bracket

Aesthetically pleasing appearance to meet patients demand.

Patterned Base Design

Provide superior mechanical retention and ensure predictable de-bonding.

Ceramic Injected Moulded (CIM) Manufacturing

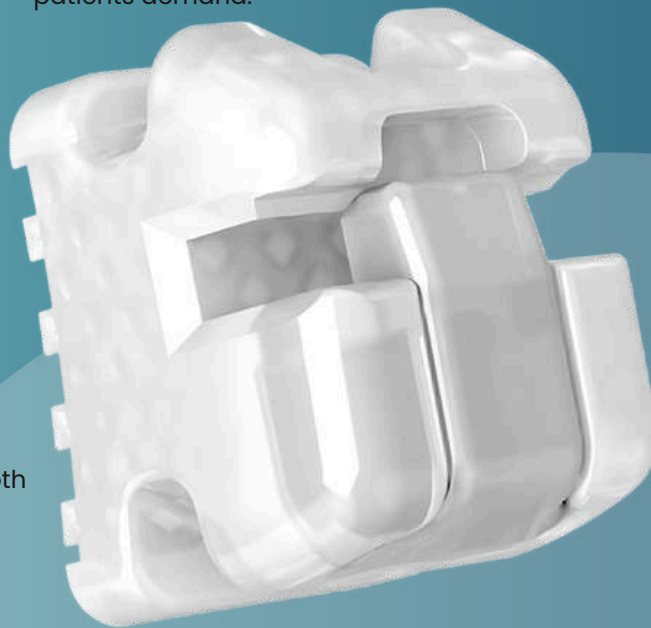

Highly polished surface with smooth rounded corners.

Advanced Passive Self-Ligating System

Low frictional resistance for efficient tooth movement.

Improved Strength

Durable design with strong tie-wings.

Reliable Door Mechanism

Four solid walls for effective torque expression and rotation control.

The Mono Crystalline Sapphire Bracket System

Nearly Invisible System, Clearly Visible Results

Perfect Aesthetics

Superior clarity and flawless bracket system. Made from pure monocrystalline sapphire for a bracket system with the highest transparency available for outstanding aesthetics. Nearly invisible against any tooth shade and stays crystal clear without staining.

Bond Base

Unique Double Fusing Method (DFM). The bonding base is coated with melted aluminium oxide spheres creating numerous undercuts that mechanically lock with the bracket adhesive. This process ensures for secure retention during the length of treatment and provides predictable debonding at the end of treatment

Patient Comfort

Low profile design with rounded, smooth corners for added patient comfort. The tie-wings are Ample for easy bracket ligation also, exceptionally strong and highly resistant to fracture.

Colour Coded ID system for easy bracket selection

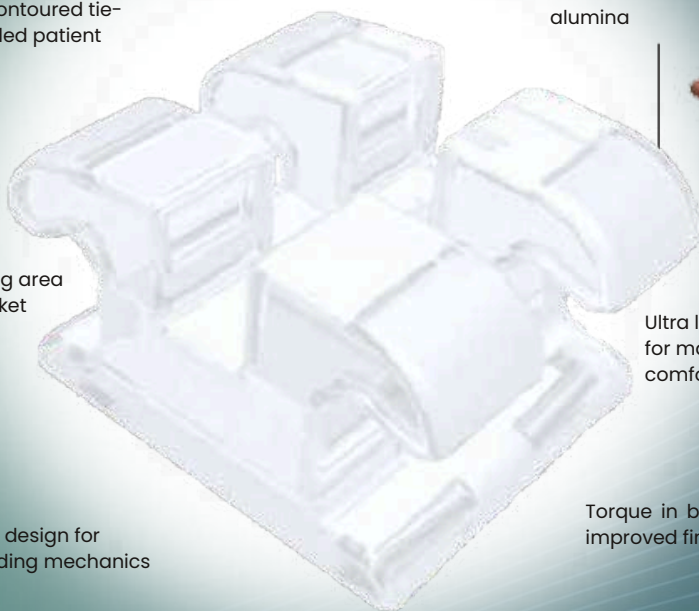

Crystal clear transparency made from monocrystalline alumina

 WATCH NOW

Strong and contoured tie-wings for added patient comfort

Ample tie wing area for easy bracket ligation

Accurate slot design for enhanced sliding mechanics

Ultra low profile design for maximum patient comfort

Torque in base for improved finishing

Unique bonding base made with melted alumina balls for superior bonding and predictable debonding

Passive Self-Ligating Bracket System

TRULY UNIQUE, PASSIVE SELF-LIGATING BRACKET SYSTEM

Five Torque Options

Available in High, Standard, Low, Roth and MBT* to suit every treatment plan

Tooth Torque	U1	U2	U3	U45	L12	L3	L4	L5
Roth	12°	8°	0°	-7°	-1°	-11°	-17°	-22°
MBT	17°	10°	0°	-7°	-6°	-6°	-12°	-17°
High	22°	13°	11°	-11°	-3°	13°	-5°	-17°
Stand	15°	6°	7°	-11°	-3°	7°	-12°	-17°
Low	2°	-5°	-9°	-11°	-11°	-0°	-12°	-17°

*Smart Line® versions of the Roth & McLaughlin, Bennet and Trevisi prescriptions are not implied to be an exact versions of any other system, nor do we claim any endorsement of their respective doctors.

Positioning Gauges

Removable positioning gauges on anterior brackets 3-3 to assist in brackets placement.

Unique Door Design

The closed door creates a fourth solid wall contact for better rotational and torque control to achieve efficient treatment and predictable finishing

Smooth Rounded Edges

Low profile design with smooth rounded facial contours to optimise patient comfort

Superior Base

80 gauge foil mesh bracket creates an optimum pad to tooth fit for greater bond strength.

Enhanced ID System

Laser marking on the bracket base and removable colour coding by quadrant on the bracket distal-gingival tie-wing to ease selection.

Durable Body Structure

Manufactured from strong 17-4 stainless steel by using Metal Injection Moulding technique (MIM) for high durability

Large Under Tie Wing Clearance

Supports early elastics, ligatures, metal ligatures and power chain

Precision Slot Depth

Accurate slot structure and superior lustrous surface finish for improved sliding mechanics

To open - Insert the bracket tool flat end horizontally into the notch on the sliding door of the bracket interface. Twist the instrument simply clockwise/counter clockwise 90°.

To close - Apply light pressure to seat the archwire in the slot base by using finger pressure or the bracket tool wire director end. Using this tool end or light finger pressure, slide the door upward to close securely.
